

DIALYSIS CENTER AVODD, TOULON (83)

AVODD, a dialysis and nephrology center is based in the Army Instruction Hospital Sainte Anne in Toulon. It is a non lucrative private establishment from Var, in France, specialised in prevention, treatment and the aftercare of the kidney disease.

After 4 months of construction work, the new unit has been entirely rethought and renovated to improve the patient care. Résinor equipped the new dialysis ward with dry and wet work benchtops in resin. We also made furnitures and the plating of walls, plus we delivered special care bed head units.
